Interview #11 STAY HOME, STAY GEEK — DLab connects during COVID-19

What are researchers thinking and working on during this challenging time?

The COVID-19 pandemic has impacted significantly the activities of Tokyo Tech researchers, many of whom can no longer conduct planned experiments and fieldwork as before. This challenging situation, however, can also be viewed as an opportunity to rethink our research activities and the future we hope to achieve.

In the Stay Home, Stay Geek interview series, DLab asks some of Tokyo Tech's leading researchers about their current thoughts, research activities, and messages to students as they remain at home. Each interview is conducted by one of three DLab members — Institute for Liberal Arts (ILA) Associate Professor and Future of Humanity Research Director Center Asa Ito, Professor Tamio Nakano of the Tokyo Tech Academy for Leadership (ToTAL), or Institute of Innovative Research (IIR) Professor and DLab Associate Director Naoto Ohtake.

[Interview #11](#) — the latest interview and first to be conducted in English — features Dr. Ludovico Minati, a researcher at Tokyo Tech's IIR.
